Tracking Nutrition Trends VI (2006) Report

Providing insights into the mindset of Canadian consumers

Who should order this report? The insights gained from the TNT series guide the actions of policy makers, health professionals, academics, and the food industry.

The TNT series was initiated in 1989 to investigate adult Canadians' self-reported knowledge, attitudes and behaviour with respect to food and nutrition issues. Each wave of the series has built on the previous findings by tracking trends and developing a benchmark on emerging issues.

- ▶ Trends — The TNT survey monitors consumers' self-reported eating habits, attitudes about food and nutrition, sources of information, understanding and use of nutrition labelling, and lifestyle.
- ▶ Emerging issues — The 2006 survey also has obtained baseline information on perceptions and behaviours toward food claims, health programs, reading menus, and functional foods.

Find out all of the details by ordering your report today!

Quantity Rates for Purchase of the TNT VI Report*	Cost*
1-14 copies	\$40.00 per copy
